The Volkswagen Type 2, known officially (depending on body type) as the Transporter, Kombi or Microbus, or, informally, as the Bus (US) or Camper (UK), is a forward control panel van introduced in 1950 by the German automaker Volkswagen as its second car model. Following – and initially deriving from Volkswagen's first model, the Type 1 (Beetle) – it was given the factory designation Type 2.

### **Volkswagen Type 2 - Wikipedia**

The origins of the company date back to 1930s Nazi Germany, and the project to build the car that would become known as the Beetle. Hitler's desire that almost anybody should be able to afford a car fitted with a proposal by car designer Ferdinand Porsche (1875-1952) -- although much of this design was inspired by the advanced Tatra cars of Hans Ledwinka.

under the backseat, there is a voltage regulator. why aren't we using this one?...oh yeah, are you are trying to use a one-wire replacement? The B+ and ground connection are the only ones we should be concerned with, the other wires should be ignored, if NOT using an external regulator-will have to make a/look at a drawing of the old system to make a schematic so we both can understand what ...
