Front suspension. The most common form of front suspension for a modern motorcycle is the telescopic fork. Other fork designs are girder forks, suspended on sprung parallel links (not common since the 1940s) and bottom leading link designs, not common since the 1960s.

### **Suspension (motorcycle) - Wikipedia**

A motorcycle frame is a motorcycle's core structure. It supports the engine, provides a location for the steering and rear suspension, and supports the rider and any passenger or luggage. Also attached to the frame are the fuel tank and battery. At the front of the frame is found the steering head tube that holds the pivoting front fork, while at the rear there is a pivot point for the swingarm ...

### **Browse All Motorcycles | Fually**

Recommissioning a stored Vincent: With rocker caps removed, also the big end quill and cylinder feed quill , and the long forward banjo bolt on the timing cover removed. And of course the main feed banjo bolt feeding the oil pump itself , ie at the bottom end of the large feed oil line, this loosened off before pouring oil into the tank above.
