Just because your car is old doesn't mean it's outdated. It Still Runs is your ultimate auto resource, whether you rotate your tires or change your oil.

It Still Runs

It means you either cut the two wires and hook them together or you put some type of jumper in the connector from one to the other. A paper clip properly installed and taped in the back of the connector may work. If you ever go to the dealer for a warranty claim for the seat belts or air bags cutting the wires will void it. The paper clip would need to be removed before any warranty work.

How do I disable the seat belt chime in my 2007 chevy impala?

i had the same problem disconnect the battery in the trunk for 30 minutes take out two fuses #25 10 amp and the 2amp above it replace them both then clean the fuse holder the computer is next to the fuse box check every wire in the connector by touching and moving it this is the fuse panel in the passenger side of the console when you are finished it will be fine
