KB520 General DCC Power Supply Information. There are many transformers and power packs that can supply input power for Digitrax boosters & command stations. Most regular DC train control packs do not have enough power to supply the full power potential of the a 5 or 8 amp booster, since they were designed to only run 1 locomotive in a blocked system.

DCC Basics: Wiring a Layout for DCC Power Layout wiring is fairly well documented, and pretty simple when you come right down to it. But I think it's worth restating some of the basic concepts as part of this section, as this is what I used as the basis of my own layout wiring described in the Electrical Systems subsection of my Model Railroad section.

Reed switches are enclosed in glass tubes that are somewhat fragile. Hall effect sensors are smaller, and solid state, but can require more complex wiring, usually a more powerful magnet, and are picky about the polarity of the magnet (usually the magnet's "south" pole must be down - make sure you have it the right way before gluing it to the engine).
