Jøtul F 118 N Installation Instructions With Technical Data

I have an old (1976) Jotul F 118. I was able to find the owners manual online. After converting all the measurements from MM to inches, it looks like for CTC the manual states 31.49 inches. Looking at the manual for the new F 118 Black Bear, the required clearance from the back to combustibles is only 9 inches. What is the difference between the 2?
