

Section 14 3 Human Heredity

There are at least twelve distinct hypotheses as to how and why bipedalism evolved in humans, and also some debate as to when. Bipedalism evolved well before the large human brain or the development of stone tools. Bipedal specializations are found in Australopithecus fossils from 4.2-3.9 million years ago, although Sahelanthropus may have walked on two legs as early as seven million years ago.

Bipedalism - Wikipedia

Genetics is a branch of biology concerned with the study of genes, genetic variation, and heredity in organisms.. Gregor Mendel, a scientist and Augustinian friar, discovered genetics in the late 19th-century. Mendel studied "trait inheritance", patterns in the way traits are handed down from parents to offspring. He observed that organisms (pea plants) inherit traits by way of discrete "units ...

This article directly addresses the scientific evidences in favor of macroevolutionary theory and common descent. It is specifically intended for those who are scientifically minded but, for one reason or another, have come to believe that macroevolutionary theory explains little, makes few or no testable predictions, or cannot be falsified.

29+ Evidences for Macroevolution: Part 1 - TalkOrigins Archive

Notes (1) Empathy is the ability to be affected by the state of another individual or creature. This is seen in bodily mimicry as well as emotional contagion. Emotional empathy has its roots in bodily mimicry, as one individual unconsciously mimics the facial expression of another.

Facets of Human Nature - Bill Meacham

A general State education is a mere contrivance for moulding people to be exactly like one another: and as the mould in which it casts them is that which pleases the predominant power in the government, whether this be a monarch, a priesthood, an aristocracy, or the majority of the existing generation in proportion as it is efficient and successful, it establishes a despotism over the mind ...

If your baby is sensitive to dairy products it is highly unlikely that the problem is lactose intolerance, although many people may tell you so.. See Is my baby lactose intolerant? for more information.. Although cow's milk protein sensitivity and lactose intolerance are not the same thing, they can sometimes occur at the same time, since food allergy can cause secondary lactose intolerance.
