A telescope is an instrument used to see objects that are far away. Telescopes are often used to view the planets and stars. Some of the same optical technology that is used in telescopes is also used to make binoculars and cameras. Light gathering ability - The better a telescope can gather light ...

### **Physics for Kids: Telescopes - Ducksters**

Kids learn about lenses and light in the science of physics including concave, convex, converging, diverging, focal point, meniscus, and plano lenses.

### **Physics for Kids: Lenses and Light - Ducksters**

this site also provides students with a good explanation of the steps involved in developing a science fair project!

### **Grades 4/5 VA Science SOL Activities**

HTML5 interactive simulations, videos and quizz in physics, chemistry, biology, earth science and math.

### **eduMedia - Interactive simulations and videos for Science ...**

This page is a collection of links for children, teachers, and parents. Science topics are based on the curriculum for Kindergarten through grade five, although many pages will be of interest to older students.

### **Teach the Children Well-Science**

If you are a teacher searching for educational material, please visit PBS LearningMedia for a wide range of free digital resources spanning preschool through 12th grade.

### **Retired Site | PBS Programs | PBS**

The millions of different chemical compounds that make up everything on Earth are composed of 118 elements that bond together in different ways. This module explores two common types of chemical bonds: covalent and ionic. The module presents chemical bonding on a sliding scale from pure covalent to pure ionic, depending on differences in the electronegativity of the bonding atoms.
